IN THE SPECIFICATION

Paragraph [0073] is sought to be rewritten as follows:

[0073] In the context of the invention, the method may be implemented, for example, by operating portion(s) of a computing device to execute a sequence of machine-readable instructions, such as the wireless communications device or the server. The instructions can reside in various types of ~~signal-bearing~~ or data storage primary, secondary, or tertiary media. The media may comprise, for example, RAM (not shown) accessible by, or residing within, the components of the wireless network. Whether contained in RAM, a diskette, or other secondary storage media, the instructions may be stored on a variety of machine-readable data storage media, such as DASD storage (e.g., a conventional "hard drive" or a RAID array), magnetic tape, electronic read-only memory (e.g., ROM, EPROM, or EEPROM), flash memory cards, an optical storage device (e.g. CD-ROM, WORM, DVD, digital optical tape), paper "punch" cards, or other suitable data storage media including digital and analog ~~transmission~~ media.
